Powered Amplifier: AC to DC (included), may also be used with existing antenna power source for retrofits

- Kit Contents:**
- Antenna
 - RV bracket for *Sensor® lift
 - Pole mount bracket
 - AC to DC power supply
 - Hardware

Get the best digital TV signal available!

Wider reception range

Makes it easier to find a signal and scan for available channels. Less directional than traditional RV antennas.

Designed for digital

Better reception of UHF signals where over 80% of new DTV channels are broadcast. Also provides great reception of remaining VHF channels.

Built-in amplifier

Enhance weak signals for improved reception capability. Includes AC to DC power supply. Also works with existing wall mount or video switch antenna power supply for simple retrofit.

Compact design

Up to 70% smaller than traditional RV antennas and offers less wind resistance.

Simple to install

Install in just minutes without any special tools. RV bracket allows antenna to be mounted in either direction to clear A/C, vent or other potential roof obstructions.

Combine with King-Dome® AIR

Get multi-directional OTA coverage by combining the off-air signals for the JACK antenna with the King-Dome AIR system.

*Sensor is a registered trademark of Winegard Co.
